SHP® Grease

Kendall® SHP Grease is a premium quality, semi-synthetic, multipurpose, extreme pressure (EP), calcium sulfonate grease specially developed for use in industrial and automotive equipment operating in wet or corrosive environments. It is recommended for equipment exposed to water contamination, saltwater corrosion and/or high temperatures.

SHP Grease is manufactured with high quality base oils and a non-soap, calcium sulfonate thickener. It is fortified with EP and antiwear additives as well as rust and corrosion inhibitors. It protects against rust and corrosion in high humidity, high temperature applications such as those found in the steel, lumber, tire manufacturing and paper industries. It has excellent load carrying capacity, high shear stability and outstanding resistance to water washout.

SHP Grease is NLGI GC-LB certified for use as a multipurpose automotive wheel bearing and chassis lubricant.

Applications

- Industrial and automotive equipment operating at high temperatures and exposed to water contamination, high humidity or corrosive environmental conditions
- Chassis parts and wheel bearings on heavy duty and fleet equipment
- Marine equipment, heavy mobile equipment and cables exposed to salt water
- Paper machine wet- and dry- end bearings and hot calender stacks
- Rolling mills, hot roll tables, continuous casters, ingot buggies and slab mills
- Steel mill roller bearings, conveyors and gears
- Centralized lube systems and auto lubbers in service shops

Features/Benefits

- Excellent oxidation resistance and thermal stability at high temperatures
- Outstanding rust and corrosion protection, including resistance to saltwater corrosion
- Excellent EP and antiwear properties
- High load carrying capacity
- Outstanding resistance to water washout
- Excellent shear stability
- NLGI GC-LB certified
